Sustainable Forestry Policy MOD-PAC CORP

MOD-PAC is committed to continually achieving certification to the SFI® Fiber Sourcing and Chain of Custody Standards and the FSC® Chain of Custody Standard.

MOD-PAC is committed to sourcing paperboard material from certified chain of custody and non-controversial sources. MOD-PAC employs environmentally, socially, and economically sustainable practices to meet the needs of the present without compromising the ability of future generations to meet their needs. This is accomplished by practicing and promoting a resource and conservation stewardship ethic.

MOD-PAC's Sustainability Policy is to promote the principles of sustainable development, recycling, and biodegradability. MOD-PAC has set an overall goal to increase the amount of recycled content in our folding cartons and to reclaim waste material from our production processes to further reduce the amount of wastepaper entering the solid waste stream.

MOD-PAC strives to use recoverable, biodegradable and/or compostable paperboard in our folding carton products. To help implement and achieve the above sustainability, recycling, and biodegradable objectives, MOD-PAC has developed and adopted appropriate programs and documented procedures to guide paperboard procurement, production of folding carton products, and associated sustainable forestry claims and labels.

MOD-PAC is also committed to annually review the effectiveness of the sustainability policy, chain of custody and fiber sourcing programs to continually improve management systems and environmental performance.

A handwritten signature in black ink, appearing to read 'Daniel G. Keane', is written in a cursive style.

Mr. Daniel G. Keane, President
